Please calibrate it for the first time. See Figure 3 in Point 8 for details

Touchable area

Remark: when touch the screen please touch the place without numbers.

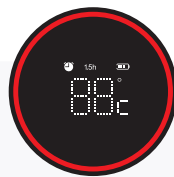

1. Temperature Display

Green 0°C-36°C

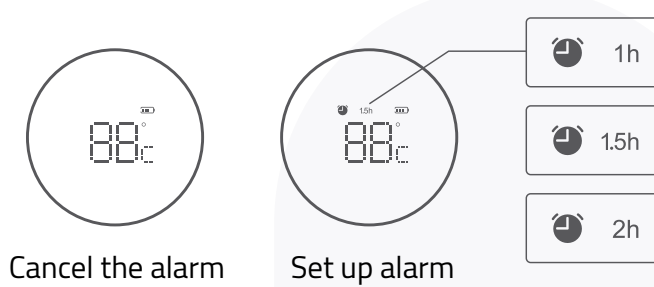

Orange 37°C-60°C

Red 61°C-99°C

- Click the screen, the screen will light up. The current water temperature will be displayed with a green, orange or red light strip according to different temperature ranges.
- There are two unit options for temperature display: Celsius °C and

2 . Remind Drinking

There are two ways for alarm setting.

1.Alarm setting on the lid

There are 3 alarm options on the lid:1H,1.5H and 2H.

Double click on the screen each time to switch the alarm from 1H,to 1.5H to 2H.

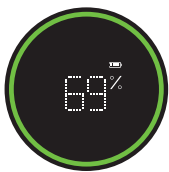

The alarms will be cancelled automatically after 8 hours without touch screen.

2.Alarm setting on APP

You can set any time in the alarm reminder setting of the APP.

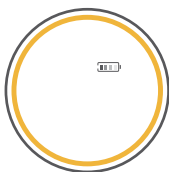

Please note that after setting salam reminders in the APP, you will not be able to switch the alarm reminder on the lid.

3.Drinking data

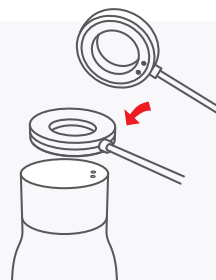

- Switch the screen from temperature to pecentage.
(Percentage = Daily / Target drinking.)
eg:69% = 1380ml / 2000ml

4.Charging

The battery symbol grid is moving while charging.
Moving stopped after charging complete.

5.Expired water reminder

When the water in the bottle has not been drunk for more than 8 hours (without touching the lid)
The display shows the "X" symbol, and the screen is red.

Why choose smart bottle ?

- Your hydration directly affects your body & well-being in unexpected ways.
- Most people are dehydrated, the average person only drinks a little more than 4 cups (32 ounces) of water per day. This is not enough.
- The Huem smart bottle can track drinking data and generate the statistics report, which to help you develop healthy drinking habits and manage your health.
