

NOORCO plus

LED TRI-PROOF LIGHT

Product benefits & features:

- 1. Waterproof performance:** It adopts special sealing structure and materials, which have good waterproof performance. It can work normally in rainy days and humid environments, suitable for outdoor, marine, port, and other damp environments lighting requirements.
- 2. Dustproof performance:** It adopts a tight sealing design, which can effectively prevent dust, particles, and other pollutants from entering the lamp body. It is suitable for environments such as deserts, factories, and warehouses that are prone to dust and particle interference, ensuring the long-term stable operation of the lamps.
- 3. Corrosion resistance:** It is made of corrosion-resistant materials and can resist the erosion of corrosive environments such as acidity, alkalinity, and salt mist. It is suitable for use in places such as marine, chemical, and mining industries that are prone to corrosion, ensuring the lifespan and performance of the lamps.
- 4. High brightness illumination:** It uses high-brightness LED light sources to provide bright and uniform illumination. LED technology has advantages such as high efficiency, long lifespan, and low energy consumption, meeting various lighting needs.
- 5. Energy-saving and environmental protection:** LED light sources have the characteristics of energy-saving and environmental protection. They are more energy-efficient and have longer lifespans than traditional fluorescent lamps or incandescent lamps. They also do not contain harmful substances such as mercury, reducing environmental pollution.

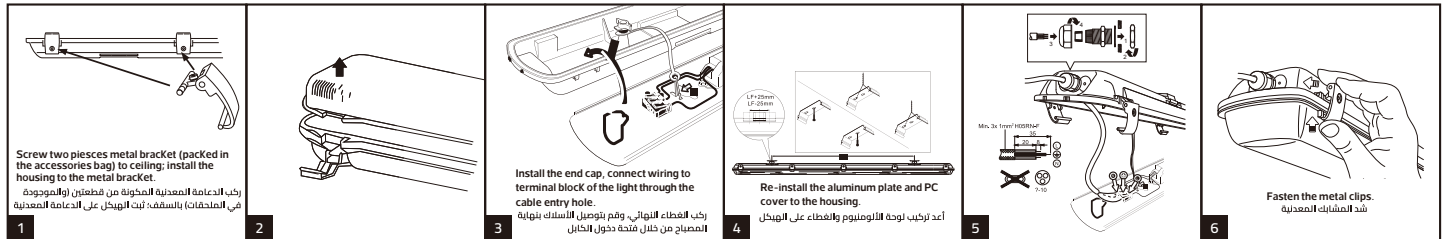

Areas of application:

Outdoor, marine, factory, warehouse

Caution:

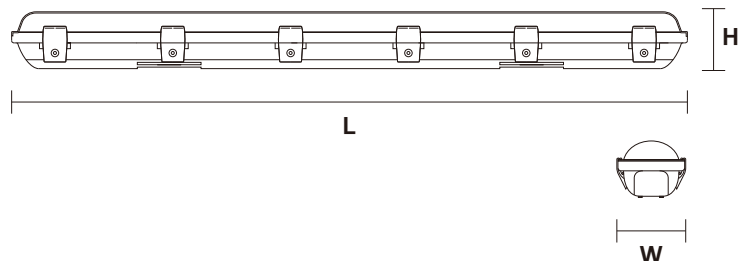

- 1. Safe operation:** Before installation, ensure that the power is disconnected and follow the correct installation steps. If you do not have relevant electrical knowledge, it is recommended to have professionals install them.
- 2. Proper placement:** Choose a suitable location to install the three-proof lights, ensuring that they can provide the required lighting effect and will not be obstructed by objects.
- 3. Sealing inspection:** Check the sealing of the three-proof lights before installation to ensure that all interfaces and switches are intact and prevent water, dust, and other substances from entering the lamp's interior.
- 4. Maintenance:** Regularly inspect and clean the three-proof lights to ensure their normal operation and extend their lifespan. At the same time, perform maintenance operations according to the instructions provided by the manufacturer.

Product Installation and Wiring Diagram

Product Specifications and Dimensions

Item Code:	NRP-3FD-36W
Input:	AC220-240V 50/60Hz
Power:	36W
Lumen Output:	5760lm
CCT:	3000K/4000K/6500K
Beam angle:	120°
IP rated:	IP65
Ra:	≥80
LxWxH(mm):	1200x95x80

ta:45°C IP65
