

NOORCO

LED CEILING LAMP

Product benefits & features:

- 1.Unique design:** The pendant light has a unique design that can become the focus of indoor decoration and add beauty to the room.
- 2.Large area lighting:** Due to the fact that chandeliers are usually hung in the center of a room, they can provide relatively uniform light and cover a large area, ensuring good lighting for the entire space.
- 3.Space saving:** The chandelier is suspended from the ceiling and does not occupy ground space, making the indoor space more spacious.
- 4.Suitable for different rooms:** Suitable for living room, dining room, bedroom and other different rooms, providing suitable lighting effects for different spaces.
- 5.Enhance the overall atmosphere:** The lighting effect of chandeliers can create a warm and comfortable atmosphere, making the entire indoor space more pleasant.

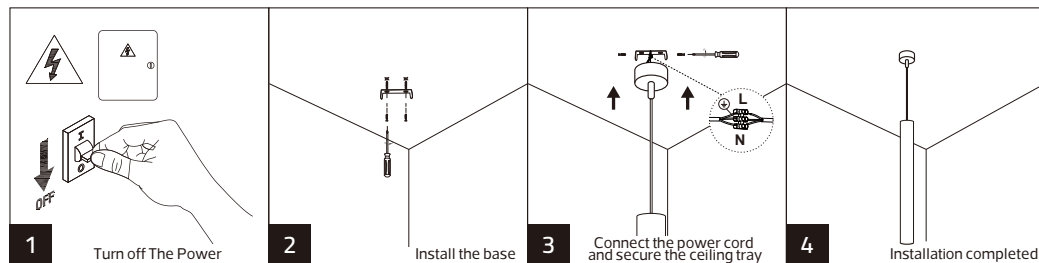

Areas of application:

Pendant lights can be used in family living spaces, such as living rooms, dining rooms, or bedrooms. Commercial venues, such as shops, offices, hotels, and restaurants. Schools and libraries, public buildings and lobbies, art exhibitions and museums.

Caution:

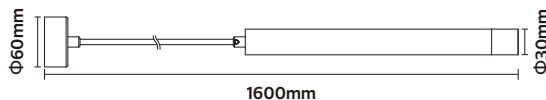

- 1. Avoid overloading:** Do not connect power sources that exceed the load-bearing capacity of the chandelier. Check the product manual to determine maximum power and load limits, and ensure installation on the corresponding circuit.
- 2. Avoid collisions:** Avoid collisions between chandeliers and other objects to prevent the lighting fixtures from shaking or being damaged.

Product Installation and Wiring Diagram

Product Specifications and Dimensions

Model No:	NR-ICL0301-5-30K-BK-60D
Input:	AC220-240V 50/60Hz
Power:	5W
Lumen Output:	355lm
CCT:	3000K
IP rated:	IP20
Beam Angle:	60°
Ra:	≥90
